

**CITY OF FORT SMITH SUPPLEMENTAL SPECIFICATION
TRAFFIC SIGNAL PEDESTAL POLE WITH FOUNDATION**

SECTION 813 of the Standard Specifications for Public Works Construction, February 2008 Edition, is hereby amended as follows:

813.02 MATERIALS

Item F. shall be deleted and replaced with the following:

- F. Concrete and reinforcement shall comply with the requirements of Section 401 "Concrete General" for Class "AAA" (4000 psi) concrete.

813.04 CONSTRUCTION REQUIREMENTS

The following paragraph shall be added to this sub-section:

In addition to these specifications and the City of Fort Smith Standard Drawings, the design and construction of traffic pedestal poles shall meet the AASHTO Standard Specifications for Structural Supports for Highway Signs, Luminaries, and Traffic Signals, 4th Edition (2001) with 2003 and 2006 interims. Each pedestal pole shall be rated to withstand a 90 mile per hour wind load per the AASHTO requirements.
