

AGENDA

**FORT SMITH BOARD OF DIRECTORS
STUDY SESSION**

October 25, 2011 ~ 12:00 NOON

**FORT SMITH PUBLIC LIBRARY
COMMUNITY ROOM
3201 ROGERS AVENUE**

1. Report on the Comprehensive Plan implementation schedule including participation from Fayetteville Forward ~ *Inclusion of Fayetteville Forward requested at the September 6, 2011 regular meeting ~*
2. Discuss City's request for franchise utility companies to not install overhead utility lines along newly constructed street corridors ~ *Resolution removed from agenda of the September 6, 2011 regular meeting pending further discussion ~*
3. Review reapportionment of city wards
4. Review preliminary agenda for the November 1, 2011 regular meeting

MEMORANDUM

To: Ray Gosack, City Administrator
From: Wally Bailey, Director of Development Services
Date: October 20, 2011
Subject: Comprehensive Plan

The Board of Directors identified the comprehensive plan as a topic for future discussion and study during their retreat earlier this year. The following description was developed from their work at the retreat:

Vision 2025 Plan

1. Assess progress of implementing the existing comprehensive plan
2. Incorporate newer components – TIP strategies report, riverfront opportunity analysis, beautification
3. Learn from other cities' experiences
4. Develop game plan

Include economic health tied to distribution center (RITA) and tourism (marshals museum), make downtown happen, quality of life/place issues to attract younger citizens/jobs, knowledge-based jobs/young professionals

What is a Comprehensive Plan?

The Comprehensive Plan is primarily a physical plan for the growth and development of the City over the next 20 years. It is designed to guide the City's day-to-day activities within the context of a long-range future vision, so that actions occur in a coordinated, efficient, and effective way. (Fort Smith Comp Plan Introduction)

The current Comprehensive Plan was adopted by the Board of Directors on November 5, 2002. The Plan was adopted after an extensive public process that included suggestion boxes at events and in all libraries, steering committee members speaking at civic and other organizational meetings, City's Focus newsletter, a store front at Central Mall, and public service announcements. A broad based Steering Committee was appointed by the Board of Directors. The Steering Committee met monthly between April 2001 and October 2002 (19 months). Between the start of the planning process in April 2001, through the Summer of 2002, more than 100 meetings and presentations were held.

I have enclosed a copy of the Comprehensive Plan Executive Summary and information from the Plan that explains the process and plan summary. The complete copy of the Comprehensive Plan is on the City website at:

<http://fortsmithar.gov/Planning/files/Complete.pdf>

To assist the Board with their analysis of the existing comprehensive plan the staff has prepared a summary of the existing Comprehensive Plan. The attached spread sheets are from the Comprehensive Plan Section 6 - Priorities Matrix with a Status column added. The status column shows some items completed, some work items have been done but do not necessarily reflect the item as completed, and some items have not been addressed due to a lack of resources or time available to address the items. City staff will be at the study session to assist with any questions about specific line items within the Priorities Matrix.

As we analyze the existing Priorities Matrix and the Plan, the Board has three options to consider:

- ◆Develop a new Comprehensive Plan. Preparation of a new plan will be more than the staff can do without the assistance of a professional planning consultant. The current Comprehensive Plan was prepared with the assistance of Gould Evans Associates, LLC. The City paid \$332,805.86 to Gould Evans for their work assisting the City and preparing the Plan.

- ◆Amend the existing Comprehensive Plan and the Priorities Matrix. Any plan that is effective needs to be reviewed and kept current. A statement from the Plan Purpose says *"As the City changes and priorities shift, the Plan may be adjusted so that it remains "living" or dynamic in nature reflecting the evolving City vision."* The amount of work required to amend the current document may require assistance of a consultant. It is possible that many ideas for amendments to the plan may actually fit within the existing goals of the Comprehensive Plan and simply require an amendment to the Priorities Matrix.

- ◆Continue with the existing plan and its priorities matrix. There are still several items in the priorities matrix that need to be addressed many which will require significant time and resources.

Additionally, Julie McQuade, Community Outreach Coordinator with the City of Fayetteville, will be in attendance at the October 25th study session. Ms. McQuade will be sharing Fayetteville's experience with visioning and community involvement as they developed their Fayetteville Forward plan.

Please contact me if you have any questions.

SECTION 1

Introduction

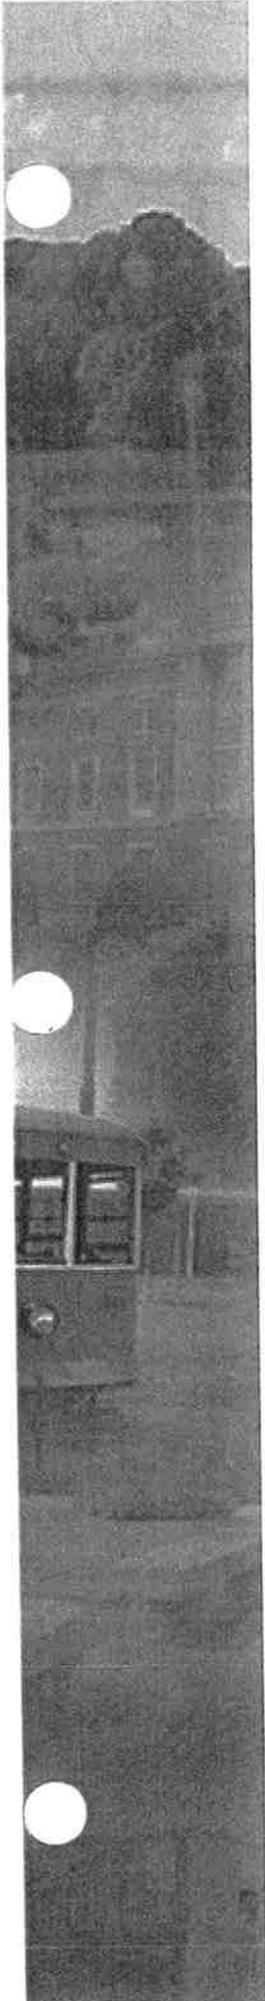

The Comprehensive Plan is primarily a physical plan for the growth and development of the city over the next 20 years. It is designed to guide the City's day-to-day activities within the context of a long-range future vision, so that actions occur in a coordinated, efficient, and effective way.

While Fort Smith has had long range plans within government departments, and has a comprehensive development code (zoning, subdivision and building regulations) in place, the City has never adopted a comprehensive plan that combines all aspects of the community's development. The Fort Smith Board of Directors recognized this

need during a January 1999 planning retreat. In October of 1999, the Fort Smith Board of Directors, Planning Commissioners and the City Staff held a retreat that concluded with the authorization to begin the comprehensive planning process. The retreat identified 27 community issues that needed to be addressed.

Factors That Stimulated The Need For A Plan Included:

- Fort Chaffee de-militarization and subsequent planning, development and negotiated annexation of 7,000 acres of land on the southeastern edge of the City.
- Development of tourism and service industries around the Convention Center which opened in 2001.
- Community Development Block Grant (CDBG) initiatives and investment of more than a million dollars a year.
- The major downtown and riverfront initiatives that led to funding and development of the Convention Center and Riverfront Pavilion and Amphitheater.
- A strong and active CBID - Central Business Improvement District - ready to act and needing an overall plan for the downtown.
- A Chamber of Commerce that works to keep the economy strong, and through those efforts, the land use, traffic and look of the City are affected.
- The need for a fully staffed parks and recreation department to serve growing demands, while seeing to the responsibilities of planning, maintaining and running programs, facilities and expansions.

Introduction

- Growing interest and activities by both the public and private sectors for infill and redevelopment of housing alternatives in the older, original sections of town.
- The evolution of Westark Community College into the University of Arkansas - Fort Smith, can and will change the dynamics and image of the City. This evolution will more directly effect the land surrounding it, and have impacts on the larger community as a partner in education, culture, arts, entertainment, and business activities.
- While history and historic preservation have long been valued by city residents, many structures, neighborhoods and historic cultural resources have been lost. A city policy and plan of action are needed to preserve the historic resources that remain.
- Zoning and land use decisions and actions have occurred on a case-by-case, ad hoc basis, leading to many incompatible activities and loss of land value for one or more neighboring parties. These actions have also led to the inability to plan appropriate infrastructure and transportation facilities.

The lack of focus or common direction of so many independent task forces, committees, institutions, individuals and organizations has not stopped movement forward. However, it has caused inefficient use of scarce resources, people working at cross purposes (often towards similar and compatible goals), higher risk development and investment, and constantly changing roles and responsibilities for city staff already overburdened with the day to day business of providing citizen services.

1.1 PURPOSE

The Comprehensive Plan provides goals, policies, and land planning principles for guiding the future development of the City. It is used to assist the Planning Commission, the Board of Directors and City Staff as they make decisions on land use and zoning issues, capital improvement programming, transportation, and coordination efforts with other jurisdictions and agencies. It also serves as a guide to creating the future Fort Smith envisioned by the community as a whole.

Arkansas municipalities have "the power to adopt and enforce plans for the coordinated, adjusted, and harmonious development of the municipality" (A.C.A 14-56-402). In addition, they shall "promote, in accordance with present and future needs, the safety, morals, order, convenience, prosperity and general welfare of the citizens."

Among the specific issues that a city's plans may address to accomplish these goals are:

- *"Efficient economic development;*
- *Appropriate and best use of land;*
- *Convenient traffic circulation of people and goods;*
- *Safety from fire and other dangers;*
- *Distribution of population;*
- *Adequate public utilities and facilities; and,*
- *Wise and efficient expenditures of funds." (A.C.A. 14-56-403(b))*

The Plan Is:

Long-range: addressing future needs, while taking into account short-range, or current issues.

General: showing the general location, character, desired community improvements, development patterns, and the relationship of these elements.

Comprehensive: addressing the physical, social and economic factors affecting the future development of the community.

Living: Through land use ordinances, budgetary activities, and other legal and policy actions the Plan will be implemented. As the City changes and priorities shift, the Plan may be adjusted so that it remains "living" or dynamic in nature reflecting the evolving City vision.

1.2 PROCESS

In 2001, a broad based citizen oriented Steering Committee was appointed by the City Directors to work with consultants and staff in developing the first comprehensive plan for the city. Members were asked to give their time to this effort based on many factors:

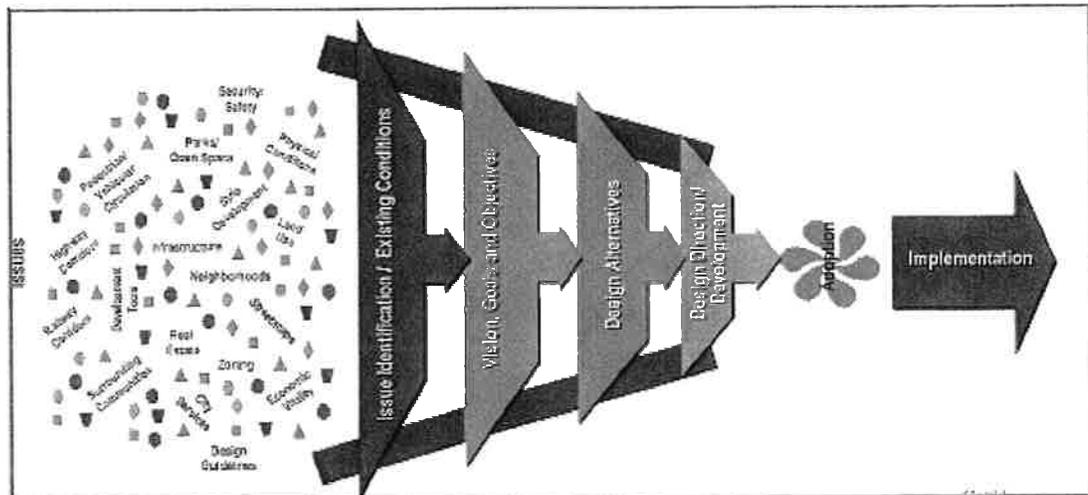

- diverse representation in perspective, experiences and neighborhoods,
- past and current participation and dedication to the community,
- being results oriented, and,
- their demonstrated ability to listen, be fair and open minded and reach consensus.

Orientation of the Steering Committee began in April 2001. The Committee met on the third Saturday of each month between April 2001 and October 2002. They followed a basic process of: information gathering; issue identification; goal setting; exploring alternative solutions; developing a preferred plan alternative; and, mapping out obstacles and steps to implement the plan.

Public Participation

1.2 PROCESS

Planning Process

Early on the Steering Committee reached consensus on the issues they would like to see the city and this plan address:

- Transportation and the current Street Plan
- Access and uses along the river
- Neighborhood revitalization and preservation improvements
- Commercial corridor development and improvements
- Downtown revitalization and Convention Tourism
- Historic Preservation
- Fort Chaffee Annexation
- City / County planning coordination
- Parks and open space planning
- Coordinated economic development
- Pedestrian and bicycle circulation
- Increased housing opportunities
- Creating a Vision and “Look” for Fort Smith
- Controlled (orderly) growth
- Annexation Policy and Procedures
- Adequacy of the current zoning code
- Development of Urban Design Standards
- Street and drainage improvement plans
- The provision of municipal services inside and outside of the city

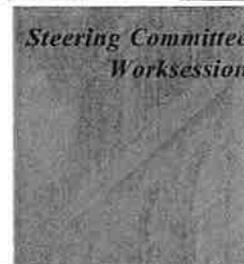

It was decided early in the Spring of 2001, that community input and support were critical to both their comfort in proceeding with their efforts, as well as ensuring that they had community consensus and support for their ideas and issues of concern. A very aggressive effort was made, beginning with the summer concert series to get citizen input.

More than 100 cards and comments were received through outreach events and from library input boxes placed in all City libraries. Steering Committee members spoke at organizational meetings, and the City's *Focus* newsletter, sent to every household, continued to summarize concepts and progress. In the fall it was decided that a storefront would provide a constant opportunity for people to participate on an on-going basis. From November 2001 through February 2002, storefront open houses were held, and public service announcements invited participation. Between the start of the planning process in April 2001, through the Summer of 2002, more than 100 meetings and presentations were held (see appendix for full listing). The Comprehensive Plan is a reflection of this extensive public process.

1.3 PLAN SUMMARY

The Plan is organized around the major issues, goals and policies developed through this process. Where ever possible a numbering system has been used for easy reference, however in most cases the numbering system does not indicate a priority ranking, unless indicated. Section 2 is devoted to the conditions that exist in the city today (2000-2002), and establishes benchmarks that the subsequent sections of the Plan will address. While this is primarily a physical plan document, the social and economic aspects of the City are addressed to some extent, with Section 2 outlining the social and economic make-up of the City at the time of the 2000 Census.

Section 3 outlines the thought process and investigations into alternative growth and development scenarios that the Steering Committee went through in order to establish the preferred Plan Framework. This is included so that an understanding of the values and alternative scenarios that the City has to choose from can be referenced.

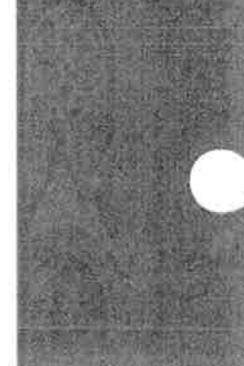

Section 4 is devoted to the Plan Framework, and the policies and recommended actions that will make the City of Neighborhoods a reality. This section is broken into the main goals and issues that the Plan is focused on resolving. This is the heart of the document and establishes the context for Section 6 on Plan implementation.

Section 5 focuses on specific land areas of concern and change; the downtown, the riverfront, development of Fort Chaffee and land outside of the existing city limits, the Extra-Territorial Jurisdiction (ETJ).

Storefront Openhouse - Central Mall

Section 6 is the action section of the Plan. It sets forward recommended actions, a generalized time frame and areas of responsibility. Through the Priorities Matrix, direction is given to implement the City of Neighborhoods vision for Fort Smith.

City of Fort Smith Comprehensive Plan (CompPlan) Timeline:
Meetings & other Activities

2001

March	Steering Committee (SC) appointed
April 7 to meet	First official meeting. Introductions and orientation. The SC decides the third Saturday monthly
April 28	All-day orientation to city staff & department, issues and resources
May 19	SC meeting
June 16	SC meeting
July 4	CompPlan display and public comment boxes set-up at River Park Amphitheatre during the Mayor's Fourth of July event
July 21	SC meeting
July 21	CompPlan display and public comment boxes set-up at Fort Smith Park during the Old Fort River Festival
August 18	SC meeting
September 18	CompPlan presentation to the Manufacturing Executive Association
September 25	CompPlan presentation to Lion's Club
September 29	SC meeting (rescheduled from 9/15/02)
October 5	CompPlan presentation to Chamber of Commerce Board of Directors
October 19	CompPlan presentation to Noon Exchange Club
October 20	SC meeting at new 'home'-Central Mall Storefront Official ribbon cutting by the Chamber of Commerce. Photo of such is published in their October 2001 newsletter
October 20 & 21	Open House at Central Mall storefront. Public invited (press releases to local media)
November 16 & 17	House at Central Mall storefront. Public invited (press releases to local media)
November 17	SC meeting
December 13	University of Arkansas-Fort Smith Leadership Presentations
December 14 - 16	Open House at Central Mall storefront. Public invited (press releases to local media)
December 15	SC meeting
December 29	CompPlan public service announcement (PSA) distributed to run on local broadcast & cable media.

2002

January 15	CompPlan discussed on local TV station, KPOM, public affairs program: Polly's Show
January 18 & 19	Open House at Central Mall storefront. Public invited (press releases to local media)
January 18	Investors and Developers Presentation and Discussion
January 19	SC meeting

October 1	Board of Directors Public Hearing
October 8	Board of Directors Study Session on Draft Plan
October 8	Planning Commission Adoption and recommended approval to Board of Directors.
Reveiw and comment period on Final Draft Plan	
November 5	Comprehensive Plan adopted by the Board of Dircetors

FORT SMITH COMPREHENSIVE PLAN

Executive Summary

EXECUTIVE SUMMARY

THE CITY OF FORT SMITH, ARKANSAS

COMPREHENSIVE PLAN

This is a general summary of the Fort Smith Comprehensive Plan. The Comprehensive Plan is primarily a physical plan for the growth and development of the city over the next 20 years. It is designed to guide the City's day-to-day activities within the context of a long-range, 10-20 years, vision, so that actions occur in a coordinated, efficient, and effective way. It will be used to assist the Planning Commission, the Board of Directors and City Staff as they make decisions on land use and zoning issues, capital improvement programming, transportation, and coordination efforts with other jurisdictions and agencies.

THE CHALLENGE

While Fort Smith has had long range plans within government departments, and has a comprehensive development code (zoning, subdivision and building regulations) in place, the City has never adopted a comprehensive plan that combines all aspects of the community's development. In October of 1999, the Fort Smith Board of Directors, Planning Commissioners and the City Staff held a retreat that concluded with the authorization to begin the comprehensive planning process.

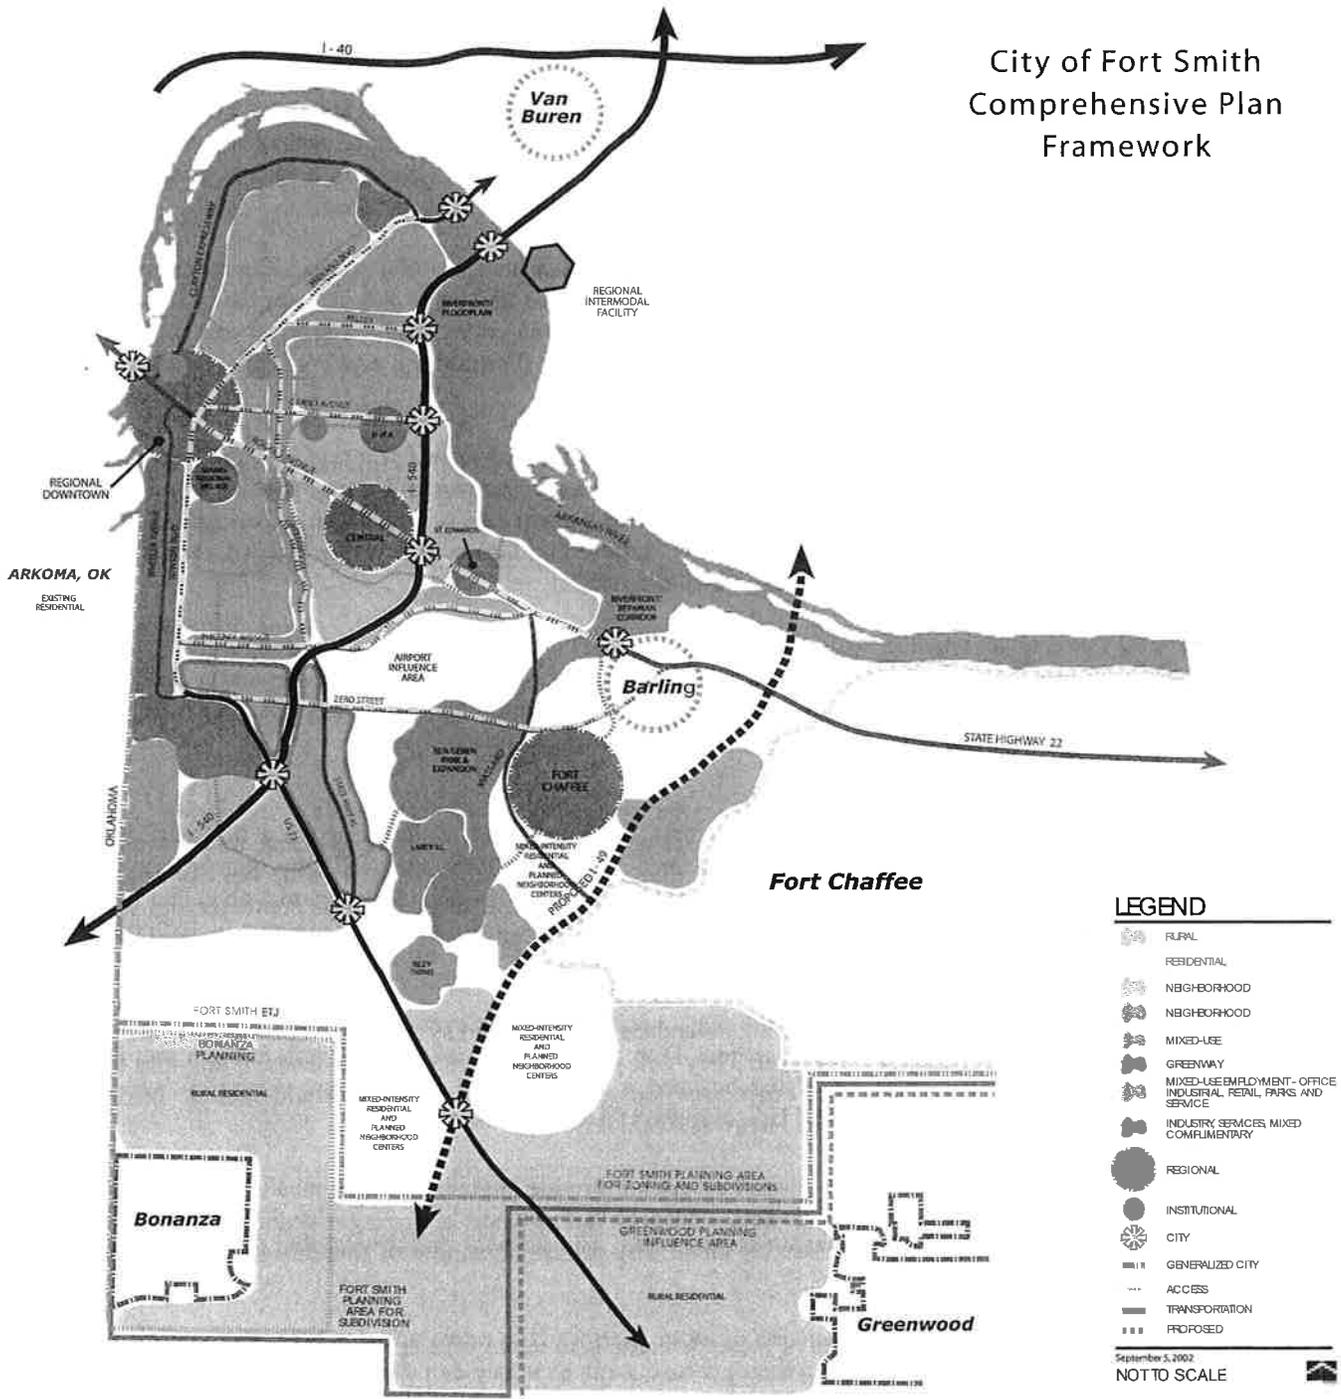

The Plan is organized around the major issues, goals and policies developed through this process. While this is primarily a physical plan, the social and economic aspects of the City are addressed as well. Because this is the City's first Comprehensive Plan, it can not lay out parcel specific proposed changes throughout the city. Rather, it is the first step in creating a proposed land use plan that shows a preferred development pattern for tomorrow. Policies and actions state how existing and future land use patterns need to be addressed, to implement the plan. The City of Neighborhoods provides both a physical framework and a policy framework that work together.

Many policies are city wide in nature and do not address specific land uses or areas of the city, while others are more specific to uses, activities, and locations. Several actions and policies overlap, achieving multiple goals. Specific land areas addressed include; the downtown, the riverfront, development of Fort Chaffee and land outside of the existing city limits, Extra-territorial Jurisdiction Planning Area (ETJ).

The City of Neighborhoods requires implementation of policies, changes to the development code and specific area plans to be created. Planning for a small area of the city differs from the comprehensive plan in that it is parcel specific and much more detailed. Area, Sector, District, Corridor, Neighborhood and Center Plans can be any size, but are focused on meeting a distinct purpose. They are usually triggered or needed when; disinvestment occurs, there are significant and/or constant changes occurring, when public improvements are needed or planned, when redevelopment opportunities arise and when large developments are on the horizon. These conditions are present along all the major corridors and throughout many of the core neighborhoods of the city. Because of the smaller scale of area plans, property owners, tenants and community groups can work together to make the area more successful.

CITY OF NEIGHBORHOODS WITH ETJ PLANNING

City of Fort Smith
Comprehensive Plan
Framework

LEGEND AND LAND USE

FRAMEWORK

The development framework sets the physical guidelines for how Fort Smith will evolve in the next 10-20 years. It provides a structure and guidelines for land use, transportation and zoning actions. While the areas indicated are general in nature, it is the first step in unifying the land use plan with new zoning and subdivision regulations. This framework is the basis for a land use plan.

Centers or "Neighborhoods" are concentrated areas of pedestrian oriented, mixed land use. They offer a variety of daily services that are more people than car oriented, and provide a focal point, or pocket of activity, within an area for meeting people, shopping and accessing public services. They will occur in a variety of scales, serving different, distinct and complementary needs for the people of the city and larger region.

Regional Centers offer the highest density and diversity of employment, culture, services, shopping, housing and entertainment to the region as a whole. Walkability within these centers is key to their design and function. There is a need to limit the number of regional scale centers based on complimentary services and function within the region. There are three primary Regional Centers: Downtown, Central Mall and Fort Chaffee each serving a distinct need.

Institutional Centers specialize in community service, and have a high priority for regional transportation access with service equal to that of regional villages. Emergency access, commuter and visitor parking should be part of an overall circulation plan. Complementary services need to be provided within walking distance, as these areas can be 24-hour communities. There are three primary Institutional Centers: University of Arkansas-Fort Smith; St. Edward Mercy Medical; and, Sparks Regional Health System.

Neighborhood Centers are small in scale and designed to meet the immediate needs of people living or working within close proximity. Generally, they provide a collection of shops, services and/or recreation that are a focal point of the neighborhood, offering the needs of daily living. Walking and bicycling should be safe options to access these areas. Kids and people of all ages should feel safe and comfortable.

The Road Network

Residential Corridors are roadways through primarily residential and institutional areas that may have been classified as arterials in the adopted 1991 Master Street Plan. Over time, they have become heavily used for through traffic. Special design considerations are needed in order to protect the residential character and values along them. As residential streets, they may be reclassified as Primary Collectors. Examples include portions of Old Greenwood Road, Jenny Lind Road, and, Free Ferry Road.

Boulevards - By partially restoring, or newly creating, a landscaped boulevard system, the roadway will function at a higher capacity through improved chanelization. They will provide an attractive path through and into town and increase the visibility and viability of the businesses located along them. These would include Midland Boulevard, portions of Towson Avenue, and U.S. Highway 71/71B South.

Commercial Corridors - The majority of arterials in Fort Smith provide the commercial space in the City. In the future, these areas will be designed to reduce auto conflicts, consolidate shopping entrances, reduce sign confusion and increase the viability of businesses on them. The primary example of this designation is Rogers Avenue.

Transportation Corridors - The main function of these facilities is to move vehicles between major destinations or through town. Land access is secondary to their purpose; examples include I-540 and U.S. Highway 71 South.

Gateways - The major entry points into the city that creates a visitor's first impression. Arrival and departure indicators, views of the city, view corridors, and way finding need to be addressed at these major points.

Planned Mixed-Use Development

Mixed-use Residential - A compatible mix of housing types and commercial and institutional services characterize mixed-use residential areas. The primary theme of these areas is to increase the compatibility of a mixture of activities through better planning and design. Many areas of the city currently have a mixture of housing types and commercial uses, but they are not very visually or functionally compatible with each other. This category can be applied to neighborhood centers or to roadways. New areas will emerge, such as west Phoenix Avenue, Kelley Highway and Massard Road south, fall into this category.

Mixed-use Employment - These areas are characterized by a complementary mix of industrial and office uses that can combine parking, circulation, security, employee amenities and services. These are major employment destinations that can benefit from close proximity to each other. In addition, employees benefit by having services in close proximity.

Residential

Neighborhood Preservation - These are existing, predominately residential areas whose character and value need to be protected, enhanced and/or restored.

Neighborhood Revitalization - These are existing, predominately residential areas whose character and value are to be enhanced and restored through proactive measures and perhaps with both public and private assistance. These neighborhoods have deteriorated through abandonment of structures and/or encroachment of industrial and commercial uses that have negatively affected the value of residential property for residential use. In some cases, these areas may have a high percentage of renters to owners, and may have many structures in poor repair, boarded up or vacant.

Residential - Indicated on the Plan Framework, these are new and developing housing developments at a variety of densities and styles, not identified yet as either an area of revitalization or preservation. These areas are still defining themselves and have the opportunity to expand and more solidly form their character.

Rural Residential - Rural land areas are only indicated in the area outside of the existing City limits. Rural development is very low density, reflecting a desire to have few neighbors and a love of the land. Lot sizes are typically, 5 -25 acres in size, unless a cluster method of development is used to maximize open space.

Parks, Open Space & Trails - These uses are a primary theme of the plan, taking advantage of the lush environment that makes Fort Smith a great place to live. Passive and active recreation, habitat and bird sanctuary spaces, wetlands and regional trail systems, represent the high quality of life that is an intrinsic part of the "Look of Fort Smith".

Floodplain, Bluffs & Natural Resources - Wetlands, floodplains, and riparian corridors flow into the Arkansas and Poteau Rivers, making land areas unsuitable for most development (regardless of historic zoning). The Ozark geology also creates pockets of natural gas and rock formations that restrict most forms of development. These areas need to be studied and identified in detail.

Extra-Territorial Planning Influence Area - This area is currently in agriculture and rural residential use within Sebastian County, and does not have planning, zoning, subdivision, or building permit requirements to govern development. By state law, the city needs to work with the county on planning for these areas, so that development occurs in a way that is compatible and economical. The Plan proposes a process to work with all affected parties to adequately plan for these areas.

GOAL I ACHIEVE A COORDINATED TRANSPORTATION AND LAND USE PLAN.

Approach: *Develop a transportation plan that reserves land in future corridors, prioritizes available funds, functions consistently with the land use plan, and capitalizes on assets such as the public transportation system, river, and highway network. Emphasis should be on connectivity, flexibility (choices of transportation modes), and aesthetic and environmental impacts.*

Critical Recommended Actions Include:

- Revise and adopt Master Street Plan for City and ETJ
- Implement access controls and reduce visual clutter on arterials
- Reroute through truck traffic in CBID and concentrate industry at high access locations
- Establish corridor specific plans and develop strong public/private partnerships for improvements

The Street Network

G1.1 Policy: Land development should be compatible with the design function and capacity of the roadway and not place burdens on it that render it unsafe or degrade its function, and conversely, road design should not negatively impact its planned use.

G1.2 Policy: Make major destinations, highly accessible by all modes of transportation.

G1.3 Policy: Minimize the growth in vehicular miles as the city grows through a variety of locational and programmatic measures.

G1.4 Policy: Address improvements to the existing street network by first optimizing access and circulation through better design and utilization of existing right-of-way, in cooperation with property owners.

Neighborhood Streets

The Regional Transportation Network

G1.5 Policy: Promote development of regional highway connections and improvements that will benefit trade, commerce (and ease of movement).

G1.6 Policy: Protect residential neighborhoods from excessive through traffic, where feasible.

G1.7 Policy: Enhance pedestrian, bicycle, transit, service vehicle and emergency circulation.

G1.8 Policy: Ensure that sufficient, well designed and convenient on street and off-street parking is provided to serve land uses.

G1.9 Policy: Provide attractive, safe and continuous detached sidewalks or other pedestrian facilities.

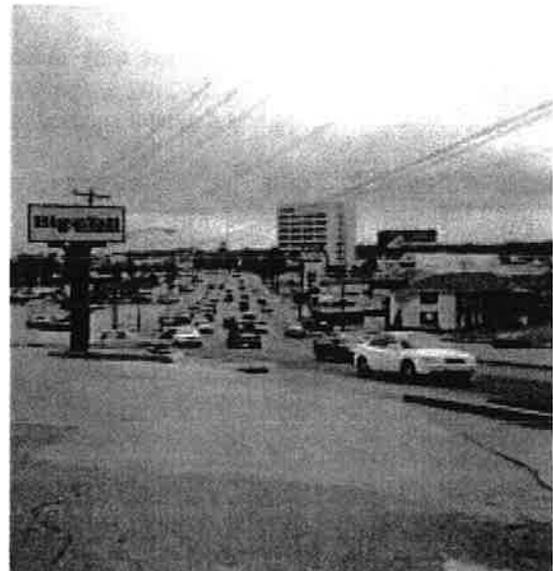

G1.10 Policy: Improve traffic flow and integrate safe pedestrian and bicycle travel into the transportation network, particularly at key intersections of high commercial and employment activity.

Bicycle

G1.11 Policy: To provide for the public's interest, safety and general welfare by encouraging and offering a well planned, safe and efficient bikeway system that will interconnect neighborhoods and provide access to both neighborhood and city-wide destinations.

Transit

G1.12 Policy: Promote and maintain a public transit system that is safe, efficient, cost-effective and responsive to the needs of residents.

Air

G1.13 Policy: Preserve and enhance the air transportation system provided by the Fort Smith

Regional Airport, while protecting the public from airport related noise and safety hazards.

Freight

G1.14 Policy: Ensure that business and industry have sufficient transportation infrastructure to support freight operations and business communications, including rail, air, highways, telecommunications, and pipelines.

G1.15 Policy: Provide convenient, reliable connections between industrial zones and regional highways to facilitate truck traffic that also minimize noise and traffic conflicts with other users.

G1.16 Policy: Work with the railroad industry in better service through the region and city.

G1.17 Policy: Support the continued improvements to the Port of Fort Smith and development of the Van Buren regional intermodal facility.

G1.18 Policy: Continue to balance water and port activities with environment and watershed improvements in cooperation with the Corps of Engineers and other interested organizations.

consideration in any project and protected where possible. Lot configurations also should be considered in roadway design, access, land use, zoning and corridor planning. Corridor plans are designed to manage access, safety, economic viability and attractiveness, and will include:

- Road facility function and purpose
- Access management
- Design and aesthetics
- Service and truck access
- Parking and building set-backs
- Land uses, activities and density
- Storm water management
- Lighting and signage

GOAL 2 IMPROVE THE FUNCTION AND AESTHETICS OF COMMERCIAL CORRIDORS.

Approach: Create, adopt and implement plans for long-term improvement of commercial corridors addressing both the function and aesthetics of prime commercial corridors.

Critical Recommended Actions Include:

- Establish a set of access management principles to be incorporated into the Master Street Plan, Subdivision Regulations, and Zoning Ordinance.
- Adopt landscaping, lighting, setback, signage, Floor Area Ratio, and other site design standards for lands along the most visible corridors in the city.

Corridor Plans are linear by definition and boundaries of these planning areas usually are a block deep on both sides of the street. Residential land use and values along arterial and collector roadways should be a major

- Focal points, intersection improvements and cross streets
- Landscaping, maintenance, transit service amenities, and landscaped medians and turn islands
- Appropriate bicycle, pedestrian and transit circulation plan element.

GOAL 3: DEVELOP A COORDINATED, CITY ECONOMIC DEVELOPMENT POLICY

Approach: Initiate proactive steps in cooperation with area Chambers of Commerce, Northwest Arkansas, Eastern Oklahoma, University of Arkansas-Fort Smith and other institutions for targeted economic development.

3.1 Policy: Grow the employment base by retaining existing jobs, assisting business expansion and start-ups, and attracting new and diverse businesses.

G3.2 Policy: Organize all economic efforts into a well-coordinated organizational structure.

G3.3 Policy: Establish standard policies for the use of economic development incentives that Measure the performance of city investments with a cost benefit analysis of the actual long-term economic and quality of life benefits to the city and region.

GOAL 4 PRESERVE, PROTECT AND IMPROVE FORT SMITH'S EXISTING NEIGHBORHOODS

Approach: *Create friendly but stringent development ordinances rigorously applied throughout the City to protect existing neighborhoods and to create strong new ones*

G4.1 Policy: Improve and encourage maintenance of structures, prevent vagrancy, structural damage, theft, and fire hazards, by providing education, incentives and programs for structural maintenance, particularly in areas designated Neighborhood Revitalization.

G4.2 Policy: Improve public participation in the revitalization process through the establishment of neighborhood associations and other organizations recreation centers, schools, medical care, and public transit.

G4.3 Policy: Maintain housing opportunities in urban areas by renovating and revitalizing existing housing and promoting infill development of vacant land within the corporate limits.

G4.4 Policy: Provide quality affordable housing by actively promoting construction of a variety of sizes and types of housing through zoning and subdivision regulations and other incentives.

G4.5 Policy: Provide convenient safe, connections between neighborhoods and important destinations such as downtown, employment centers, schools, parks, shopping areas, and neighborhood services.

G4.6 Policy: Plan for senior housing and other special population needs by locating diverse housing opportunities accessible to shopping, parks, community centers, schools, medical care and public transit.

G4.7 Policy: Require new subdivisions to develop through public streets.

G4.8 Policy: Increase public awareness, education and knowledge of the historic district and historic architecture throughout the city.

Belle Grove Historic District and Historic Preservation

G4.9 Policy: Encourage revitalization of the Belle Grove historic district and downtown historic buildings.

GOAL 5 EXPAND CITY PARKLAND AND RECREATIONAL PROGRAMMING TO REFLECT OR EXCEED NATIONAL STANDARDS.

Approach: *Take advantage of underutilized space, create a variety of recreation opportunities, and continue to pursue, expand, and implement current park plans.*

Plan Elements

Regional Facilities

G5.1 Policy: Promote and establish regional support for Fort Smith Parks and Recreation through agreements, user fees, programs and grant applications with counties and neighboring towns.

Neighborhood Parks

G5.2 Policy: Develop neighborhood parks amenities within walking distance to residents.

Greenways and Trails

G5.3 Policy: Develop greenways and trails that serve to connect the city

Recreation Programming

G5.4 Policy: Plan recreation facility land, space and programming needs with other service providers in order to meet community needs and national standards.

GOAL 6 PROTECT NATURAL RESOURCES AND REDUCE THEIR WASTE AND OVERUSE.

Approach: *Inventory and establish goals for resource protection, conservation and waste reduction.*

G6.1 Policy: Investigate and pursue a cooperative regional water supply arrangement with neighboring jurisdictions.

G6.2 Policy: Develop and manage watershed programs to minimize pollution from storm water runoff and other sources.

G6.3 Policy: Preserve wildlife habitats.

G6.4 Policy: Improve air quality by encouraging responsible industry practices and reducing sources of air pollution.

G6.5 Policy: Enhance and promote Fort Smith's recycling and reuse programs.

GOAL 7 ADOPT DESIGN STANDARDS AND CITY SIGNATURE LOOK FOR PUBLIC IMPROVEMENTS.

Approach: *Take advantage of current momentum in creating the "look of Fort Smith" and translate community support for quality urban design into consistent, enforceable design standards that leverages public and private investments as incentives for more investment in quality design.*

G7.1 Policy: Preserve and protect Fort Smith's historic and architectural resources.

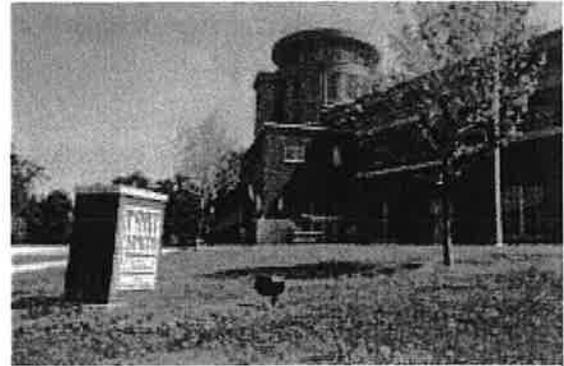

G7.2 Policy: Encourage the inclusion of public art and plazas with new public facilities and major private development.

G7.3 Policy: Enlist the vision and support of the arts community and seek partnerships with the University, convention center and other interest groups to advance opportunities for visual and performing arts within the region.

G7.4 Policy: Establish a public museum of art and an interactive children's museum

G7.5 Policy: Improve gateway features, commercial corridors and scenic views within the City.

G7.6 Policy: Implement programs to enhance landscaping and tree preservation.

G7.7 Policy: Integrate existing commercial activities within residential neighborhoods by enforcing quality urban design, and prohibiting further commercial and industrial uses in neighborhoods.

GOAL 8 REVITALIZE DOWNTOWN INTO A MULTIPURPOSE ACTIVITY CENTER.

Approach: *Create an AM/PM activity center with a consistent image and strategy for redevelopment. Identify opportunities for public participation, and establish incentives and market niche strategies.*

Housing

G8.1 Policy: Increase the number and type of residential opportunities in and around downtown.

Access & Circulation

G8.2 Policy: Improve the accessibility of downtown by increasing public transit access, implementing an efficient parking plan, and creating safe and attractive pedestrian and bicycle connections within downtown and between adjacent neighborhoods.

Economics & Marketing

G8.3 Policy: Retain and expand existing job base in downtown by developing strategies that support existing businesses, and by directing specific economic development actions to downtown.

G8.4 Policy: Concentrate available resources to encourage job creation and population growth in the downtown and riverfront area.

G8.5 Policy: Develop and promote niche markets that distinguishes downtown from other retail and entertainment options and reinforces downtown's position as a destination.

G8.6 Policy: Locate cultural activities, entertainment options, service-related businesses, and public, private, or institutional programs in downtown.

Design & the Look of Fort Smith

G8.7 Policy: Improve the aesthetics of private buildings and public areas in downtown

Management & Coordination

G8.8 Policy: Establish full-time CBID marketing and management position in cooperation with city, CBID, Chamber and other property and business owners, who sole task is revitalizing downtown.

GOAL 9 REGAIN CITY ACCESS TO THE ARKANSAS RIVER FRONT.

Approach: Acquire the necessary property and create specific planning actions to make the river front accessible to the citizens of Fort Smith.

G9.1 Policy: Integrate the Arkansas River frontage with new and existing development.

G9.2 Policy: Comprehensively plan access and development along Clayton Expressway to reflect passive and active recreation, pedestrian, bicycle and tourist activities.

G9.3 Policy: Provide recreation activities and access to the Arkansas River while preserving and protecting the natural environment, watershed and critical wildlife habitats.

G9.4 Policy: Integrate unified design and construction standards that complement downtown and city design elements, yet provide a symbol language distinct to the riverfront.

G9.5 Policy: Land development within the river district needs to reflect uses appropriate to the 100-year flood plain and adjacency to the downtown and residential neighborhoods.

GOAL 10 COORDINATE AND PLAN FUTURE DEVELOPMENT WITH NEIGHBORING JURISDICTIONS.

Approach: Develop better relationships with the neighboring cities, counties, and property owners to ensure compatible development patterns both inside and outside of the City limits, and mitigate or eliminate physical and economic barriers that may create inefficient land use and development patterns.

G10.1 Policy: In recognition of the impacts of uncoordinated growth and development, the City of Fort Smith will exercise its extra-territorial jurisdiction over land in Sebastian County.

G10.2 Policy: The City will annex land under any of the following circumstances:

- The extension of city water/sewer or roads is a requirement for the development of the land.
- A more logical service area boundary would be created.
- The elimination of an existing County "island" would occur.
- A more efficient provision of all urban services would be the result.
- Issues of health and safety and general welfare would be addressed.
- A neutral or positive fiscal impact to the city would result.

G10.3 Policy: Subdivision of land within the 5 mile ETJ will comply with city subdivision and infrastructure guidelines as revised to address rural and estate development.

G10.4 Policy: The city will take a leadership role in:

- Working with the County, private developers, land owners and school districts;
- Ensuring consistent and compatible development patterns, both inside and outside the existing city limits; and,
- Mitigating or eliminating any physical or economic barrier that may create unsuitable land use and development patterns.

G10.5 Policy: Protect rural lands from premature growth.

G10.6 Policy: Ensure adequate, well-maintained infrastructure and public facilities for all development and plan infrastructure and service provision ahead of development.

G10.7 Policy: The City will consider a variety of options in its exercise of the ETJ, and will propose a long-term growth and development plan that embraces the City of Neighborhoods philosophy while addressing the preferences of existing county residents for a rural lifestyle.

NEXT STEPS

Implementation of a Comprehensive Plan does not happen over night. It requires that activities occur on many fronts simultaneously, over many years. The tools, priorities and actions that need to occur for this plan to be implemented are simple. Re-orienting and reordering individual efforts into a work plan for the city is more difficult. The essential steps that begin the plan implementation process are as follows:

- Organize and staff to accomplish the mission;
- Set priorities for actions and funding;
- Establish the partnerships and process to achieve success;
- Communicate effectively with the community and affected parties;
- Establish benchmarks and check-points to monitor progress; and,
- Establish an outside monitoring entity, a continuation or modification of "the Comprehensive Plan Steering Committee".

Actions that need to occur include:

- Revisions to the zoning and subdivision regulations
- Writing, adopting and enforcing a housing code
- Revisions to the Master Street Plan and classification system
- Corridor, neighborhood, center and district plans

MEMORANDUM

To: Ray Gosack, City Administrator

From: Stan Snodgrass, P.E., Director of Engineering 

Subject: Discussion of City's request for franchise utility companies to not install overhead utility lines along newly constructed street corridors

Date: October 20, 2011

We are beginning to see plans for proposed development along sections of the newly constructed Chad Colley Boulevard south of Massard Road. Franchise utility service in this area is primarily non-existent, and installation of new franchise utility lines to serve development along this corridor will be required. This would include but not be limited to electric, phone and cable TV.

The September 6, 2011 regular meeting of the Board of Directors included a resolution requested by the Board of Directors urging the franchise utility companies to not install overhead lines within these types of street corridors. This would be in an effort to maintain the more aesthetically pleasing appearance along the street right of way corridor.

This item was tabled at the September 6, 2011 meeting to allow for further review at a Board study session. Representatives from Arkansas Valley Electric Cooperative Corporation and Oklahoma Gas & Electric Energy Corporation will present information on this issue at next Tuesday's study session.

MEMORANDUM

October 21, 2011

TO: Mayor and Board of Directors

FROM: Ray Gosack, City Administrator

SUBJECT: Ward Reapportionment

After a census count, the city must examine the population totals in its 4 wards to ensure there's equal representation for each ward. Attached is a letter from the legal staff which explains when ward reapportionment must occur.

Based on 2010 census figures, the city isn't required to re-draw its ward boundaries to achieve population balance. However, the board may find it desirable to do so. There's a nearly 12% population difference between ward 2 (20,775 persons) and ward 3 (23,204 persons). Below is a discussion of the advantages of each option and considerations should the board decide to re-draw ward boundaries.

- Leaving ward boundaries unchanged means that no precinct has to be moved from one ward to another. This results in no confusion that changes in ward boundaries might create.
- Fort Smith's continued growth to the south and southeast will worsen the imbalance between wards 2 and 3. The population imbalance among wards has been increasing over the last 20 years as shown on an attached spreadsheet. If the imbalance isn't addressed now, the changes needed after the 2020 census will likely be more substantial.
- If ward boundaries are re-drawn, they should be done so that each ward is as **geographically compact** as possible, **follows voting precinct boundaries** so that precincts aren't divided into multiple wards, involves **moving as few precincts** between wards as possible, and achieves the **greatest equity in population distribution**.

If the board desires to leave ward boundaries unchanged, it will need to pass a resolution confirming that the current ward boundaries will continue in effect. If the board desires to adjust ward boundaries, the staff has prepared a map (attached) which meets the criteria discussed above. This map keeps the population of all 4 wards within 2% of the average population per ward and reduces the largest variance between wards from 11.7% to 3.1%. It results in moving only 3 voting precincts from one ward to another.

Any changes in ward boundaries don't require a public hearing. However, the board may find it desirable to allow for a period of public comment before any ward map is considered for adoption.

The staff recommends that a ward reapportionment occur as shown on the attached map and spreadsheet. The disparity in populations between wards has increased over the last 20 years, and will continue to become more disparate as Fort Smith grows to the south and southeast. A reapportionment made now will also avoid the need for a more extensive ward reapportionment when the 2020 census is taken. If there's any questions or a need for more information, please contact Sherri Gard or me.

Ray

cc: Jerry Huff, Sebastian County Election Coordinator

NOTE: Sebastian County was required to re-draw precinct boundaries to comply with the state's legislative re-districting which occurred earlier this year. The city's re-districting of wards is based on these new precinct boundaries. These new precinct boundaries have some slight variations from the previous ones.

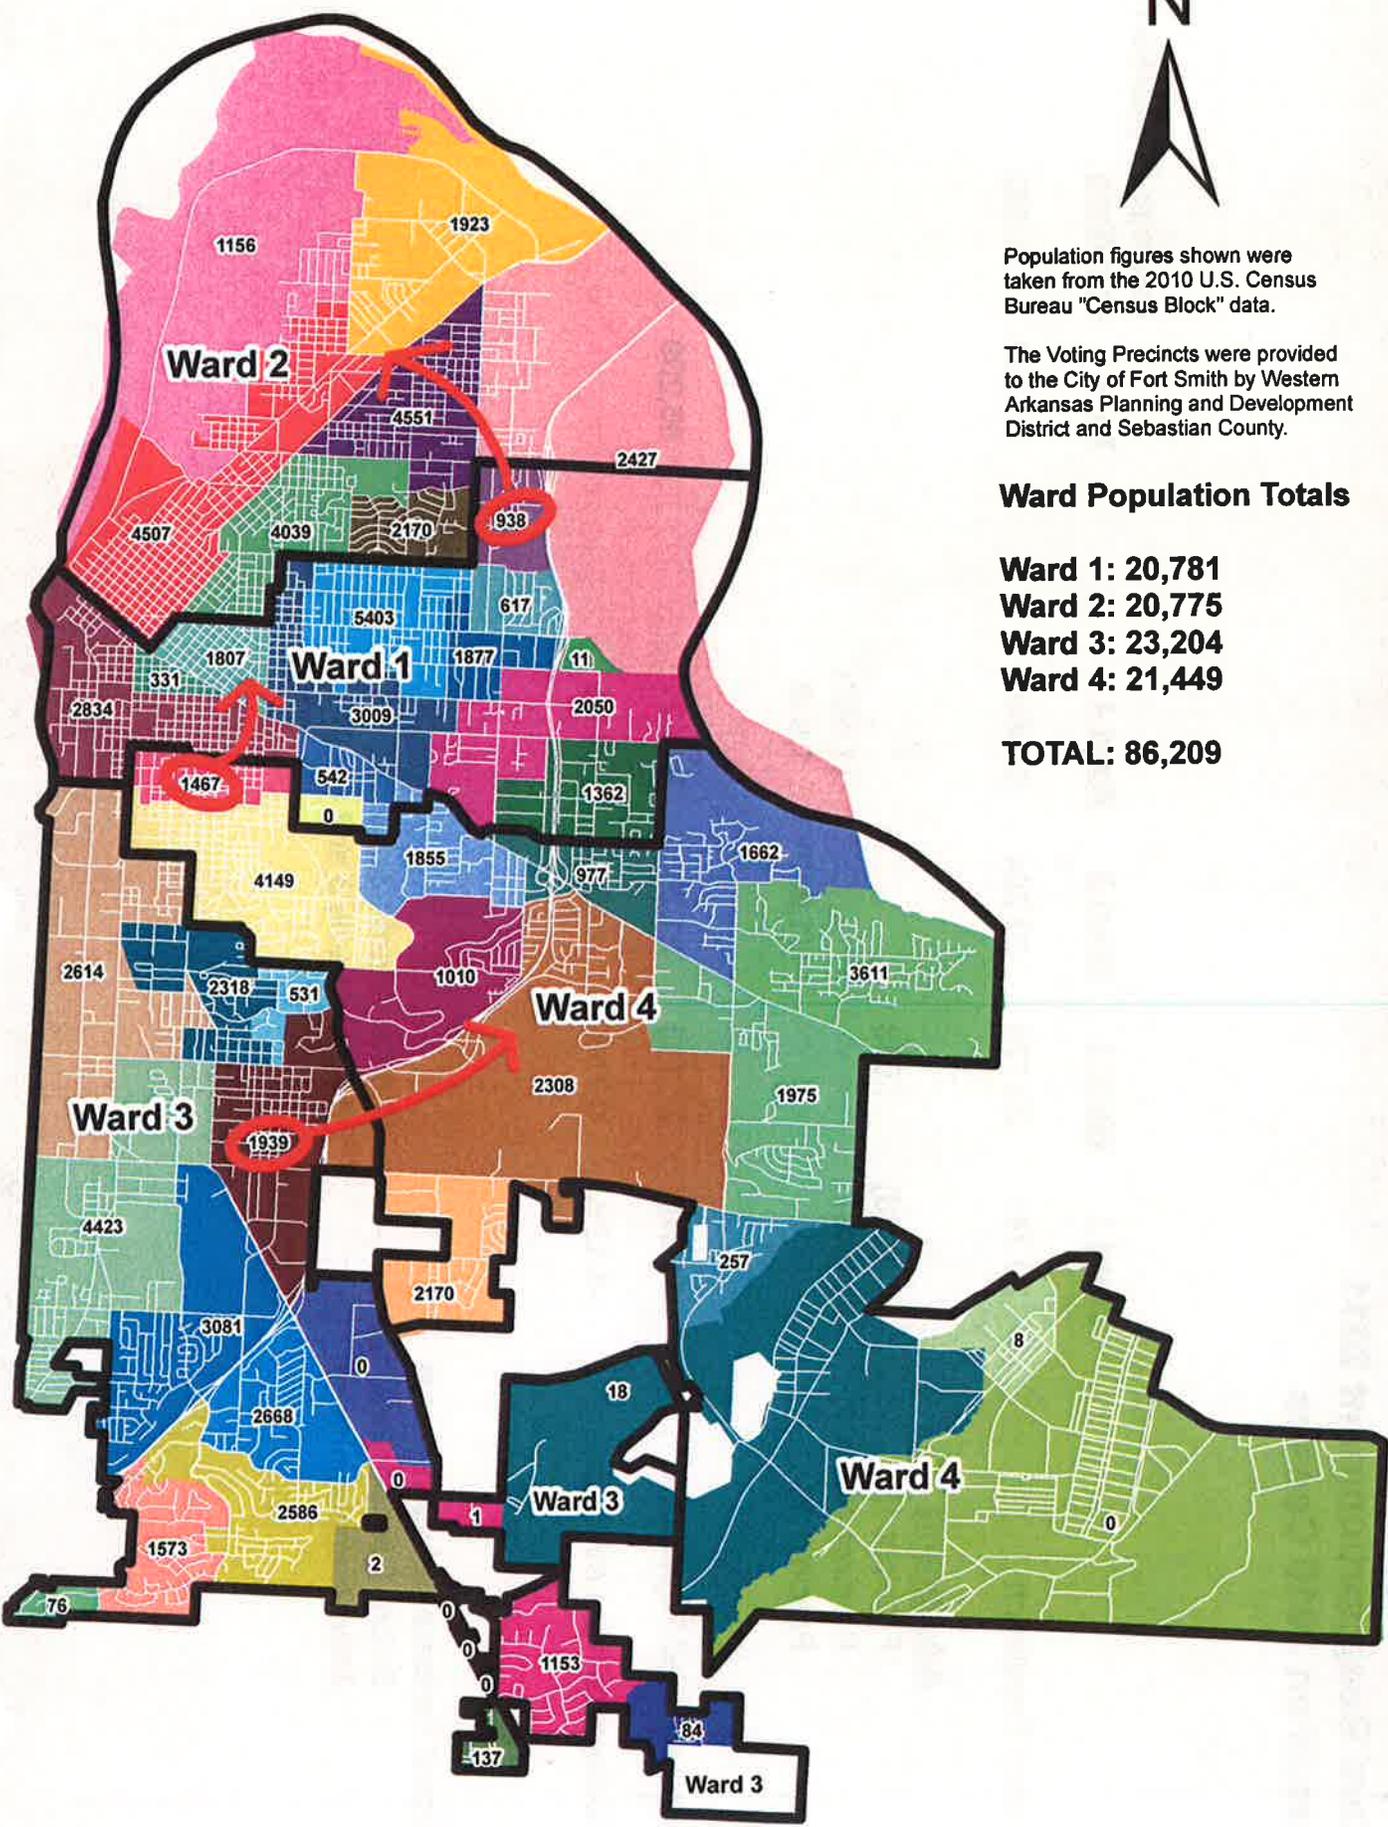

Population figures shown were taken from the 2010 U.S. Census Bureau "Census Block" data.

The Voting Precincts were provided to the City of Fort Smith by Western Arkansas Planning and Development District and Sebastian County.

Ward Population Totals

- Ward 1: 20,781
- Ward 2: 20,775
- Ward 3: 23,204
- Ward 4: 21,449

TOTAL: 86,209

Re: Apportionment Among the Wards

Dear Mr. Gosack:

As you are aware, the federal census has just been completed. A.C.A. § 14-48-107(c)(1) (Repl. 1998) provides:

The board of directors of the city under the city administrator form of government shall review the apportionment among the wards after each federal census in the city or in the event there is an imbalance in population among the wards in excess of fifteen percent (15%).

(Emphasis added.) The statute goes on to note that, “[t]he board of directors may reapportion the wards to maintain substantially equal population in each ward whenever they deem necessary.” Id. at (c)(2)(A) (emphasis added).

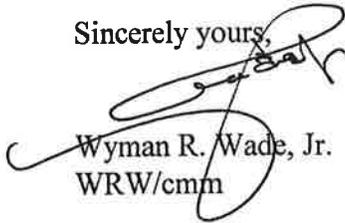

In Abate v. Mundt, 403 U.S. 182 (1971), the United States Supreme Court acknowledged that “[i]n assessing the constitutionality of various apportionment plans, . . . [the US Supreme Court has] observed that viable local governments may need considerable flexibility in municipal arrangements if they are to meet changing societal needs . . . and that a desire to preserve that integrity of political subdivisions may justify an apportionment plan which departs from numerical equality.” 403 U.S. at 185 (citation omitted). In so stating, the Supreme Court recognized that the particular circumstances and needs of a local community as a whole may sometimes justify departures from strict population equality. Id. In Abate, supra, the U.S. Supreme Court found that, though the reapportionment plan involved in that case did show a total deviation from equality of 11.9%, the plan did not contain a built-in bias tending to favor particular political interests or geographic areas and that the circumstances before the Court did not indicate the reapportionment plan violates the Constitution.

The recent federal census reveals variations of less than 10% among several Fort Smith wards, with

the greatest deviation being 11.6% vis-à-vis wards 2 and 3. Where, as here, the increase in population in ward 3 seems to be attributable to recent housing development in that area of the City, and thus the resulting deviation not attributable to built-in bias favoring particular political interests or geographic areas, it is our opinion that the ultimate question of redistricting at this time becomes a policy matter for the Board of Directors. We believe that were a court to review the existing deviation between wards 2 and 3, it would find that the present deviation of 11.6% is not violative of equal protection. As a caveat, however, it is to be noted that, if population growth continues in any one or more wards as compared to other wards, the issue of redistricting should be revisited.

If you have questions about this opinion, let us know and we will attempt to respond further.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Wyman R. Wade, Jr.", written over the typed name. The signature is stylized and cursive, with a large loop at the end.
