

River Valley Transportation Providers

Below is a listing of transportation providers and human service agencies that are working together to promote voluntary coordination. Many of these agencies have been actively involved in meetings to identify commonalities in service characteristics, issues and specialized training conducive to the River Valley since July 2004. The formation of the River Valley Transportation Providers has been effective in the dissemination of classified informational documents relating to the nations security since 9-11 and proved valuable during the relief efforts of Hurricane Katrina.

Abilities Unlimited
