

RESOLUTION NO. R-116-21

RESOLUTION AUTHORIZING THE PURCHASE OF TWO (2) AUTOMATED SIDE LOADERS FOR THE CITY OF FORT SMITH SOLID WASTE SERVICES DEPARTMENT

BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE CITY FORT SMITH, ARKANSAS, THAT:

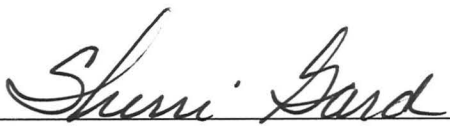

The bid, as indicated by the enclosure, for the purchase of two (2) automated side loaders from J & R Equipment, LLC for \$724,224.40 is accepted.

This Resolution adopted this 3rd day of August, 2021.

APPROVED:

VICE-MAYOR 

ATTEST:

CITY CLERK

Inter office Memorandum

TO: Carl Geffken, City Administrator

COPY TO: Jeff Dingman, Deputy City Administrator

FROM: Alie Bahsoon, Purchasing Manager *AB*

SUBJECT: Purchase of Automated Side Loaders

DATE: July 28, 2021

Per Ordinance 93-05, the City is authorized to participate in the State Cooperative Purchasing program. This process has enabled the City to take advantage of other negotiated contracts that the State of Arkansas currently participates in. One of these contracts is Sourcewell, a national municipal contracting agency offering national contract purchasing solutions by facilitating and awarding national competitively bid contracts. Because of their contract, local governments nationwide are permitted to purchase through their cooperative purchasing program.

This is to certify that Labrie Enviroquip is a member of the Sourcewell cooperative consortium network and is the manufacturer of mobile refuse collection systems and J & R Equipment LLC is the chassis provider from whom the complete units will be provided by to the City under Contract No. 091219-LEG.

The attached resolution is to authorize the purchase of two (2) trucks at \$362,112.20 each and to repeal Resolution R-12-21. Funding for these automated side loaders has been appropriated for in the 2021 Budget under the Landfill Construction & Sinking Fund, Capital Outlay-Heavy Equipment (11186065-531200).

Be advised that this ordinance and purchase fulfills all of the purchasing obligations as mandated by both state and local purchasing requirements and I am therefore recommending that the enclosed resolution is approved.

Please let me know if you should have any questions.

Re: Truck Purchase – Automated Side Loaders

The 2021 Budget for the Department of Solid Waste's Residential Collections Division (program 6302) includes the purchase of two (2) automated side loaders. At the January 19, 2021 meeting, the Board of Directors approved the purchase of AutoCar ATX Cabs and Chassis with "tip-to-dump" Labrie 31cy packer bodies from \$670,420.40 from the State Procurement Office's Sourcewell contract, similar to one truck that was purchased in 2020 and put to active use on March 23, 2021.

The "tip-to-dump" packer body lifts the packer like a dumptruck to allow the waste to empty into the landfill using gravity. This is different than the "full-eject" packer bodies our previous side loaders use, which uses a mechanical means of pushing the waste horizontally out of the rear of the truck. Since the receipt and use of the first truck with the "tip-to-dump" feature, staff has determined that this type of packer body does not work as well on our landfill as the "full-eject" packer bodies. The center of gravity with the "tip-to-dump" unit on the landfill is high, as the driver has to lift the bed into the air to unload while driving forward several feet to allow all of the garbage to empty. In comparison, the "full-eject" packer body remains horizontal and low to the ground as it offloads. The "full-eject" packer body also allows for the collection of more waste on each route, due to the blade compacting the garbage more tightly, resulting in fewer trips to the landfill to offload. The maintenance shop also prefers the "full-eject" packer body over the "tip-to-dump" style as there are fewer critical moving parts to break down.

Recognizing that the Board has already authorized the purchase of two additional "tip-to-dump" units from the statewide purchasing contract, staff asked if we could change the order for these two units to the "full-eject" type of packer body. The truck/chassis would still be the same, only the side loader packer body would be different. Purchasing Manager Alie Bahsoon secured the pricing of such a change with the vendor from the state purchasing contract. Changing the order would result in a new price of \$724,224.40, an increase of \$53,804 from the previously authorized purchase. Such funds are budgeted in the Solid Waste Department's capital equipment replacement fund for 2021.

On the Board's agenda for the August 3 regular meeting is a resolution authorizing the purchase of two automated side loaders for \$724,224.40, and repealing Resolution No.R-12-21.

Please contact me if there are questions related to this agenda item.
