

Fort Smith Fire District

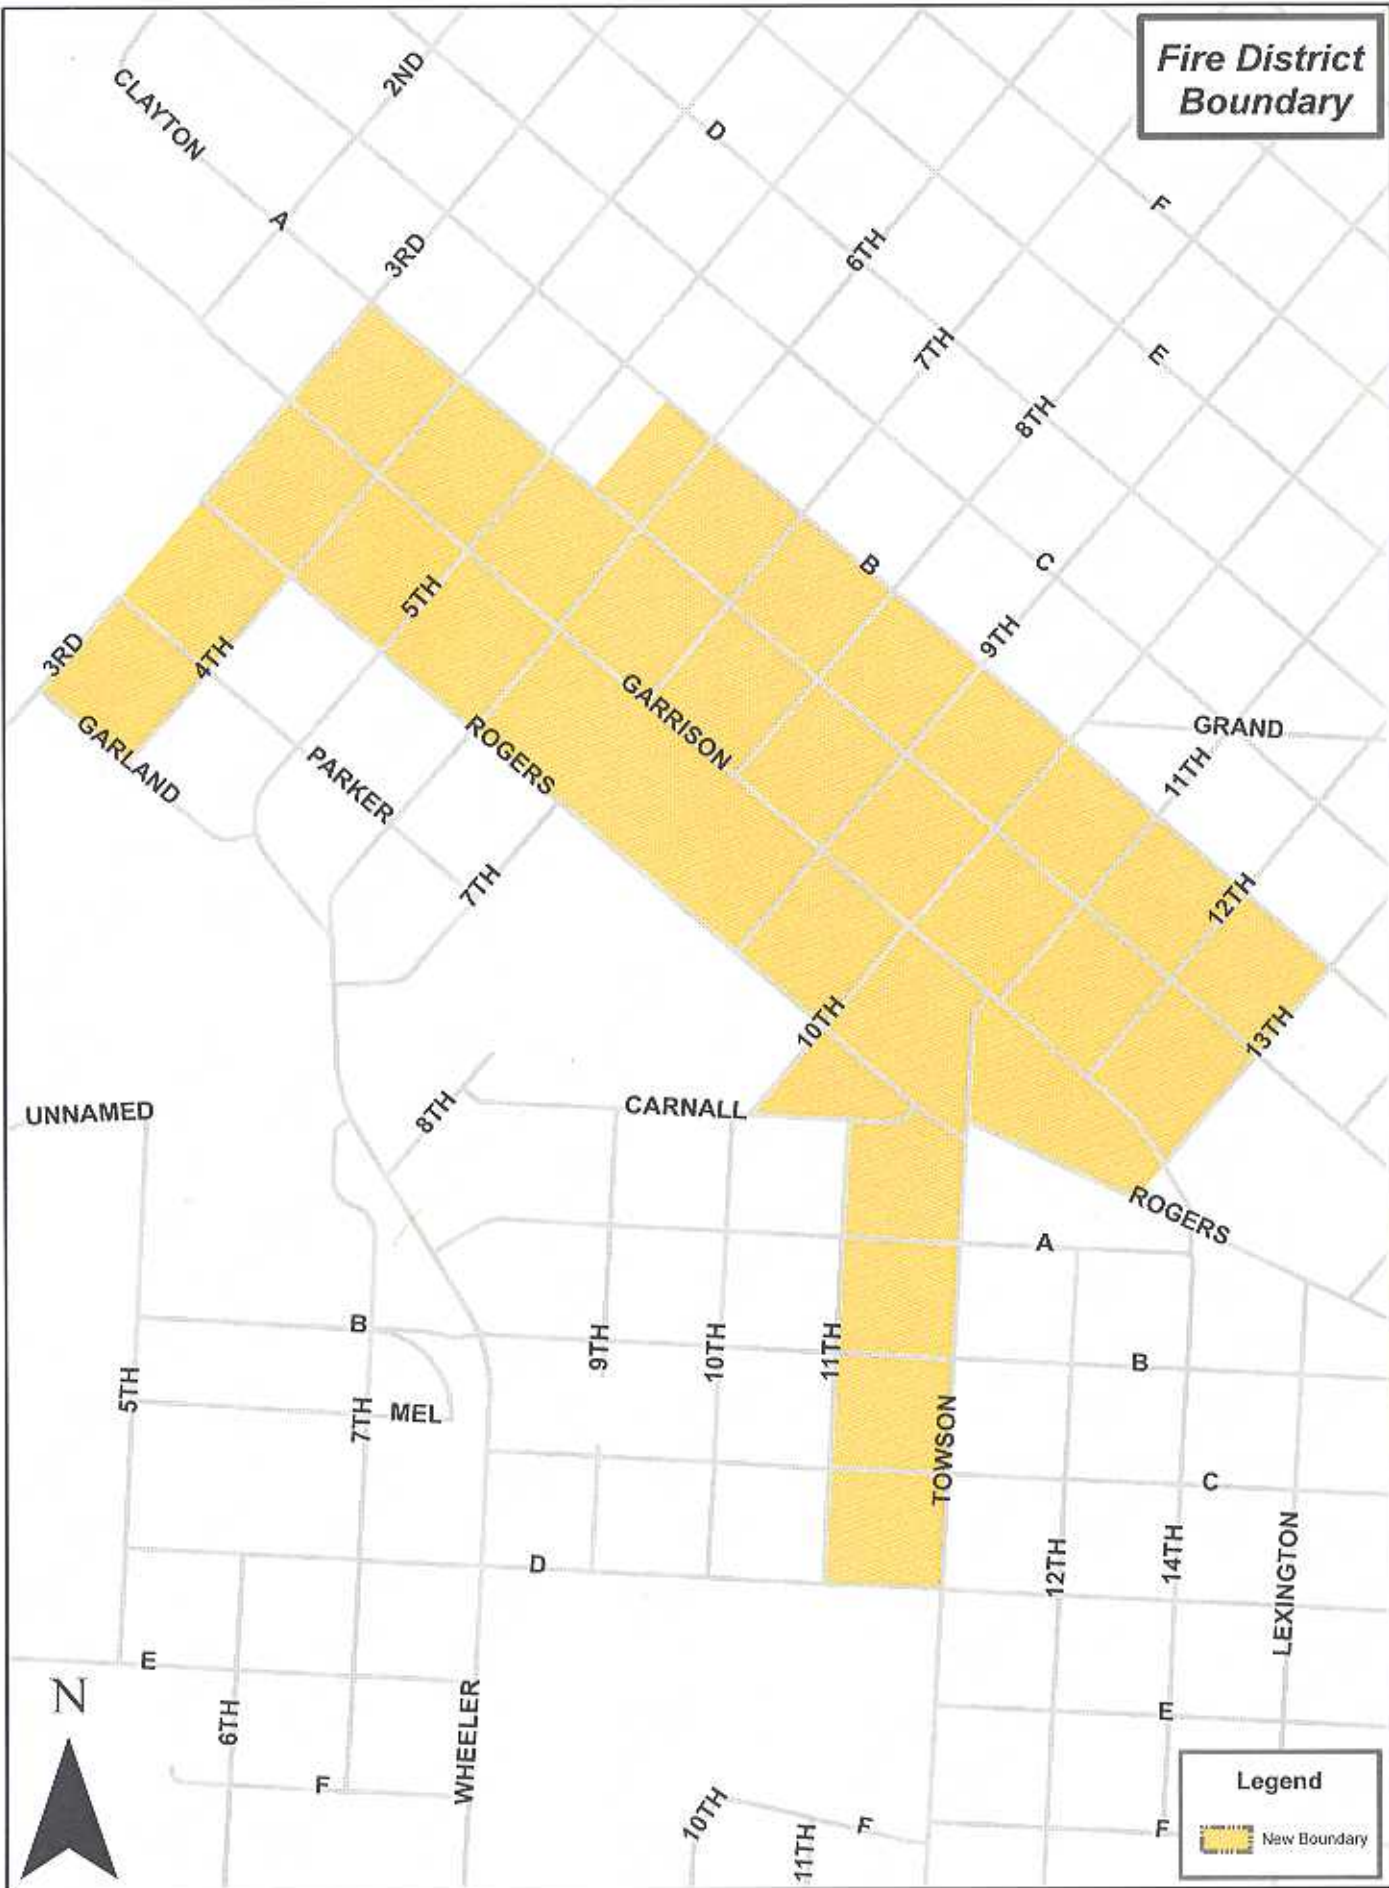

The City of Fort Smith has established a specific area in the downtown as a Fire District. Fire District's are established to reduce the possibilities of a conflagration fire. Fire District's and the special code requirements have proven to help prevent conflagration fires that have destroyed many downtown districts.

The Fire District Map shows the boundary of the district. All structures in the Fire District must meet the requirements of the Arkansas Fire Prevention Code, Appendix D.

Please contact the Fort Smith Building Safety Division if you have any specific questions or want a copy of the specific code requirements for the Fire District.

Please scroll down to the second page to view the Fire District Map.
